Adjustable postural management  
and pressure redistribution

# Modular pressure redistribution and positioning, ideal for individuals with asymmetries or high risk of pressure ulcers

## Cushion dimensions

<b>A:</b> Ischial zone	Adjustable
<b>B:</b> Trochanter support	11 cm
<b>C:</b> Medial thigh support (Abductor)	Adjustable
<b>D:</b> Front thigh trough	Adjustable
<b>E:</b> Lateral thigh support (Adductor)	11 cm

## Features

- Modular Floam® inserts, easily adjustable for pelvic obliquity, rotation and to prevent pelvic slide
- 9 to 30 Floam® cells, dependent on cushion size, in Low, Medium and High fill for detailed positioning
- Floam® “surround“ provides femoral stability
- Waterproof foam base for additional protection
- Broad range of sizes from pediatric 30 x 30 cm to large adult at 58 x 40 cm with 250 kg maximum user weights
- Long life performance for consistent results

## Benefits

- Control pressure redistribution over ischial, sacral and trochanteric areas
- Easy adjustment for pelvic obliquity, rotation and to minimise pelvic slide
- High level stability for activities and transfers
- Can readjust over time to meet a client’s changing needs
- Minimal maintenance and consistent performance over time

## Applications

- Clients with high risk of pressure ulcers also requiring shear reduction
- Clients with pelvic obliquities and rotation
- Clients with progressive conditions that can change over time
- For clients who have difficulty maintaining their cushions, particularly in isolated locations
- Clients with discomfort or pain during mobility on uneven terrain or curb drops

**Cushion features**

- 1: Waterproof foam base
- 2: Floam® trochanteric and lateral thigh supports
- 3: Floam® cells, each color coded
- 4: LYCRA® inner Cel-Pak® cover
- 5: Multi-stretch, water resistant Dartex®/Nylon outer cover

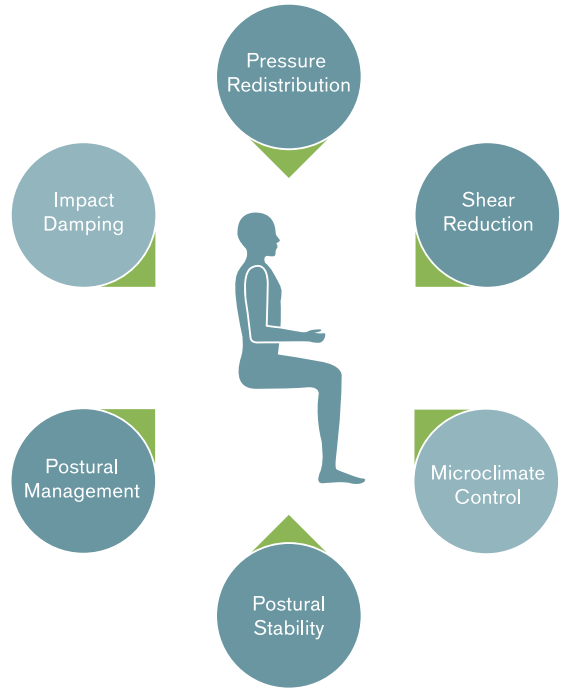

Floam® cells can be individually replaced for adjustment of posture, pressure redistribution and maintenance
